ARJUN MANIKANDAN
College Station, Texas • (214) 604-0861 • axm5507@gmail.com

EDUCATION

Texas A&M University – College Station, Texas **GPA: 3.93**
Bachelor of Science in Honors Computer Science **Expected May 2029**

- Pursuing Double Major in Statistics, Minor in Business
- Relevant Coursework: Discrete Mathematics, Program Design and Concepts, Calculus III, Business Information Systems Concepts

EXPERIENCE

Southwest Airlines **September 2025 – December 2025**
Consultant

- Built **predictive model** using **flight data** to **forecast** the number of checked bags per flight, enabling efficient **data-driven** scheduling
- **Cleaned** and **pre-processed** data and **implemented** models like **neural networks, decision trees**, and **random forest classifiers** using **PyTorch** and **Scikit-learn**
- Achieved **R^2** score of **0.8423**, presented results to **Southwest executives**

Prudent Consulting Services – Carrollton, Texas **June 2024 – August 2024**
Cybersecurity Intern

- **Monitored** and **analyzed ~500+** security logs to detect **threats/suspicious activity**
- **Improved** system **performance** by **optimizing** search queries**, reducing** runtime by **~20%**
- **Identified** numerous critical **system risks** through **enhancing** security protocols and **performing** vulnerability inspections
- Obtained **Splunk Core User** certification

PROJECTS

Personal Website **January 2026 – February 2026**

- **Developed** personal portfolio website using **HTML5, CSS3**, and vanilla **JavaScript** with modern **ES6 modules**
- **Implemented** interactive **WebGL** particle system using **OGL library** with custom **GLSL shaders**, and built **React.js-based** particle component with configurable properties using **React 18** and **ReactDOM**
- Created **custom JavaScript animations** including typewriter and decryption effects using **setTimeout based sequencing**

Face ID Smart Lock **June 2025 – August 2025**

- **Designed** facial recognition program in **Python** using **face_recognition library, integrating** real-time camera **input** and **detection thresholds**
- **Configured** local **SQLite database** to **manage** user face **data**, **integrating** it with recognition **pipeline** for efficient lookups
- **Deployed pipeline** on **Raspberry Pi,** using **RPi.GPIO** library to drive **servo motor** for physical lock control upon verified recognition

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript
Web/Frontend: React, Next.js, HTML, Tailwind CSS
Backend/Databases: Node.js, PostgreSQL, FAISS
ML/AI: TensorFlow, PyTorch, LangChain
Cybersecurity: Splunk, Cisco CCNA

AWARDS

- Texas A&M Engineering Honors
- Technology Student Association (TSA) National Qualifier
- USACO Silver
- UTD Battle of the Brains 1st place (2024)
